Good Roads Convention

Important Resolutions Passed and Association Organized to be Known As "The Crows' Nest Pass National Highway Association"

Will Not Conflict With The Work Already Being Carried On By The Alberta and British Columbia Motor Leagues.

The Good Roads Convention of the Crows' Nest Pass district held at the Cosmopolitan hotel on Wednesday was well attended. Representatives were present from practically all towns between Medicine Hat and Cranbrook.

The object of the convention was to organize for the promotion and furtherance of a scheme for co-operation for the immediate adoption and construction of a Canadian National highway that would route through the Crows' Nest Pass. The question was freely discussed, and, judging from the press and some it appears that no other route could suggest itself to the authorities as being feasible.

The meeting on Wednesday was presided over by Mayor Hardie, of Lethbridge, while Mr. J. H. Smith, of Blairmore, acted as secretary for the meeting.

Several resolutions were passed, the most important including a request to the B. C. government to change the law of the road from left to right as is the case in the United States, and to make travel in B. C. safer for visitors from other provinces and the States. Many instances of narrow escapes owing to confusion now existing were cited by those present.

Another resolution was passed urging upon the C.P.R. to reinstate the Calgary to Spokane train, via Lethbridge, on the time formerly run by the old local.

The following resolutions were moved by Mr. Laws, of Lethbridge, and seconded by Mr. Harris, of Lethbridge, and was carried unanimously:

1. Whereas we understand that a Canadian Highway Act is now before the Dominion Government, the chief object of which is the construction of an "All Canadian" highway from Glen Bay, near Sydney, Nova Scotia, to Cape Scott on Vancouver Island, and

2. Whereas to serve the best interests of the whole Dominion, taking into consideration the engineering difficulties, this highway should be built by the most direct route, and

3. Whereas, we consider the most direct route between from Winnipeg to Medicine Hat, Lethbridge and the Crows' Nest Pass, and

4. Whereas, on account of the low altitude of the route through the Crows' Nest Pass it is open for traffic much longer each year than any other route through the Rocky Mountains, and

5. Whereas, there is at the present time an existing motor road from Winnipeg to Vancouver via the Crows' Nest Pass with the exception of 115 miles to be constructed in British Columbia west of Sidney at an approximate cost of \$750,000 as follows: Sidney to Kesteven 6 miles, Nelson to Rossland 4 miles, Rossland to Paulson 32 miles, Princeton to Hope 73 miles; and

6. Whereas, said route would serve the most populous industrial and commercial centers and agricultural communities in the West, and

Racial Question and League of Nations

Paris. — William Hughes, premier of Australia, made the flat statement to the Associated Press that he was unalterably in opposition to the proposed racial equality amendment to the covenant of the league of nations or to any form of it, however mild in recognizing that principle.

The American amendment concerning the Monroe Doctrine and the Japanese racial amendments were not included in the covenant of the league of nations as sent to the drafting committee. The amendments may be offered later at a plenary session of the peace council or before the council of ten.

The Japanese delegation to the peace conference continued to press for an amendment to the covenant of the league which would go as far as the conference was willing to concede toward the promulgation of the principle of the equality of races. The original Japanese proposal, which met with speedy rejection, has been modified by them several times until it stands today. It calls for "recognition of the equality of nations and just treatment of all their nationals." It was generally understood that several of the leading delegations, including the United States mission and the majority of the British, were inclined to believe there was nothing objectionable to an amendment thus framed.

"Australia," said Premier Hughes, "cannot accept this proposal which strikes at the very root of the policy that we have maintained so long, which is vital to our existence and which we have guarded as zealously as has America her Monroe Doctrine."

"I am anxious to avoid anything likely to hurt the susceptibilities of the people of other nations, but on this point, since we cannot give it, it is best that I should speak plainly. We cannot agree to the insertion of any words in the covenant or in the treaty of peace, that would impair or even question our sovereign rights in regard to any and every aspect of this question."

"One of the principles of the league is that there shall be no interference in the international affairs of its sovereignty in matters essential to its welfare to enter the league."

"I cannot but regard the proposed amendment as an effort to establish a position in which ultimately some nations would find their internal policy challenged by the league at the instigation of one of its members. The amendment, no matter how innocuous it may seem in form, is certainly aimed at giving the league control of questions relating to immigration, naturalization and matters which cannot be surrendered by any state without such impairment of its sovereignty as to make it, in effect, a subject state."

"If the league is able to compel a state to amend its immigration, naturalization and franchise laws, there remains to the state only the shadow of sovereignty. The shadow has gone. No free nation could agree to dictation in such a matter from the league of nations. Intimate problems belong to and must remain under the control of the individual nation."

London. — Replying to Brigadier General Croft in the house of commons, Right Hon. Andrew Bonar Law said that no agreement will be entered into at Paris which would interfere with the full control of the United Kingdom or of the dominions over their own customs duties.

Paving the Way For Permanent Peace

London. — The Paris correspondent of the Pall Mall Gazette says on high authority that "in order to avoid perils which would inevitably arise if preliminary peace terms are not drafted until such time as the various commissions shall have finished their labors, and have presented their respective reports, the representatives of the great powers have drawn up certain proposals which seem ample to constitute the basis of the first treaty, or one analogous to that signed at Versailles in 1871."

The correspondent adds that these proposals are under the consideration of the "inner circle of four," F. E. Smith, Lloyd George, Clemenceau and Orlando and President Wilson, which has temporarily superseded the council of ten, and that this arrangement will greatly expedite decisions.

"A final settlement will not be im-

Defeat Daylight Saving Bill

Resolution Defeated in Commons by a Vote of 165 to 30

Ottawa. — A resolution in favor of the re-enactment of the daylight saving bill this year was defeated in the commons, the vote against it being 165 to 30. The resolution was moved by Major R. C. Cooper, Vancouver South, a Unionist member, and seconded by Hon. Rodolphe Lenioux.

The debate occupied the entire sitting and it was evident from the beginning that the opponents of the resolution were in the majority. The rural representatives of Ontario and the prairie provinces were practically a unit in their opposition, while the urban representatives of the east, along with practically a solid British Columbia and a majority of the Quebec members, both rural and urban, favored the re-enactment of the legislation of last year. The maritime province vote was split. Only seven members from Ontario favored daylight saving.

Huns Held Danish Residents

Paris. — Germany is detaining Danish residents of Schleswig who desire to return home after having been released from Russian prisons, according to advices reaching the French foreign office. These men were among Germans taken prisoner by the Russians during the war and who, after being let go in Russia, attempted to return to Schleswig. They are, however, it is declared, being imprisoned in Germany and denied permission to go home.

ALL CHILDREN LOVE "SYRUP OF FIGS" FOR LIVER AND BOWELS

Give it when feverish, cross, bilious, or for bad breath or sour stomach. Look at the tongue, Mother! If coated, it is a sure sign that your child has a stomach, liver and bowels trouble.

When peevish, cross, listless, pale, doesn't sleep, doesn't eat or act naturally, or is feverish, stomach sour, breath bad; has stomach-ache, sore throat, diarrhoea, full of cold, give a teaspoonful of "California Syrup of Figs," and in a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of his little bowels without griping, and you have a well, playful child again.

You needn't coax sick children to take this harmless "fruit laxative." They love its delicious taste, and it always makes them feel splendid. Ask your druggist for a bottle of "California Syrup of Figs," which has directions for babies, children of all ages and for grown-ups plainly on the bottle. Beware of counterfeiters sold here. To be sure you get the genuine, ask to see that it is made by "California Fig Syrup Company." Re-use any other kind with contempt.

Weather Supplied

Montreal. — The Marconi Wireless company has completed arrangements for supplying airmen to aviators who may attempt to cross the Atlantic.

A complete series of bulletins about weather conditions over the area to be traversed will be compiled from advices to ships at sea and will be sent out from the company's Glace Bay station and picked up by the aviators.

ed at," continues the correspondent, "but the terms will be sufficiently firm, drastic and definite to provide for an enduring peace, justify in large measure early demobilization, simplify the grave international food problem and pave the way for speedy industrial reconstruction and financial reorganization."

"The principal aims of the proposals now before the inner council are:

- "1. To ensure ample securities for the future protection of France, especially on her eastern frontier;
- "2. To establish a strong Italy, with a formidable northern barrier against aggression;
- "3. To create a strong Poland;
- "4. To found a league of nations, pledged on material as well as moral grounds, to the preservation of world peace."

British Strikers Resume Work

Railway Strike Resolution Was Rescinded and Miners Out are Returning

London. — The delegates to the conference of the National Union of Railwaymen have decided to accept the offer of the government for the settlement of their demands.

J. H. Thomas, general secretary of the union, said that the settlement was made subject to satisfaction being obtained on some points yet outstanding. The strike resolution was rescinded by the conference.

Thirty thousand South Wales miners have resumed work and the remainder of the strikers will fall in line.

Hun Liners Arrive in England

Leviathans of Atlantic Now Being Handed Over in Obedience to Allied Terms

Copenhagen. — The delivery of German merchant ships to the allies continues, despatches received here from Berlin says. Various vessels of the Hanza line sailed from Bremen and the North German Lloyd liners Zeppelin, 15,000 tons; Waldeck, 6,517 tons; and Prinz Friedrich Wilhelm, 17,000 tons, sailed recently and were to be followed by the Meiningen. The North German Lloyd steamers Prinz Ludwig, 9,600 tons; Frankfurt, 7,400 tons; Altenburg, 7,000 tons and the new steamer Meissen, were to sail soon.

Our steamers of the North German Lloyd allotted to the allies are also preparing to sail soon.

The German Whine Over Peace Terms

Mons Welcomes Canadians

Paris. — The municipal council of Mons gave an official reception to General Loomis, officer commanding the Third Canadian Division, which formed part of the first army which liberated Mons on November 11.

French Post Abolished

Paris. — President Poincaré, acting on Captain Andre Tardieu's suggestion, has signed a decree abolishing the post of French high commissioner at Washington on April 1.

Weimar. — Speaking in the national assembly, Philipp Scheidemann

the German chancellor, said semi and non-official reports were increasing that fresh aggravations in the peace conditions are expected to be announced; that unprecedented sums in compensation are to be imposed; that wide stretches of purely German territory are to be taken and that crushing restrictions are to be imposed in financial and military matters.

"Assuredly a large part of these alleged conditions are invented," the chancellor continued, "so that by repetition, they will accustom us to these unheard of demands, and the final conditions may seem almost bearable to us. They are invented in order to create an atmosphere which will suffocate protest even against a peace of violence. Our peoples, which were ill-treated by the war, recognize this method. A cry, not of a Chauvinist nature, but of the deepest despair which appeals to the highest there is—to the conference of humanity—is going up throughout Germany."

Herr Scheidemann said the protests against the alleged conditions were due to patriotic fears. The government knew this loyalty to the empire was one of the most valuable possessions entrusted to its control and would not permit it to be stretched upon at home or abroad. The chancellor appealed to the people to stand together, adding:

"The so-called radicals of the left have no right to protest against a period of oppression for we are responsible under the treaties of Brest-Litovsk and Bucharest."

Declaring that Great Britain had rejected a proposal to establish an international tribunal to investigate responsibility for the war, Herr Scheidemann said:

"Even if Germany were responsible for all the crimes she is accused of, has she thereby lost the right to protest against letters which will throttle her?"

"So was worse than Brest-Litovsk because Spa shows that it learned nothing from Brest-Litovsk."

HELP WANTED!

Keep away from the flame of the candle if you don't want your wings singed, is a proverb as old as the hills. So old we have almost forgotten to apply it to ourselves. In every community men and women are imitating the moths. How many times have we been singed by the fascination of that long distance "bargain"? And how many times have we come back, and back again, to the flame? How much money is lost each year crowd closer and closer to the flame? It is our business to put that flame out. Wanted!—A few men and women in our community to apply the snuffer.

Opposed to Fixed Prices

Views of Hon. Crerar and the Government Seem to Harmonize

Ottawa. — Hon. Mr. Crerar, answering W. D. Cowan, of Regina, in the agricultural committee, said that in opposing a fixed price for wheat, he spoke only for himself and not for the government.

It is a habit that ministers have; only the premier speaks for the government. At the same time, those on the inside at Ottawa know that the sentiments of the government are those of Mr. Crerar. They have been talking about it since last fall and there has been so far no division of cabinet opinion against the proposal. Mr. Crerar broke the ice, but, voicing only his own views as a private citizen, he voiced, unofficially, the views of his colleagues.

Saskatchewan members will now throw the question into parliament with a direct resolution calling for a fixed price. The outlook is not promising.

Dominion Troops Parade in London

London. — It is understood that Lord Milner, British secretary for the colonies, is giving his personal attention to the question of the ceremonial parade through London by the Dominion troops before their departure for home.

Many newspapers here are constantly expressing regret that the overseas soldiers are being allowed to depart practically without a send-off.

Rheumatism

In Back and Leg

Sometimes So Bad Could Not Walk—Pain Almost Unbearable—Found a Cure After Five Years of Suffering

Sanguedo, Alta, April 8.—Here is more proof that the way to get rid of pain is by cleansing the system of poisonous impurities. When the kidneys fail to do their work of purifying the blood there is sure to be pain and suffering. Lumbago, rheumatism, backache, headache, pains in the limbs, are the natural result. Mr. Robinson found that when he got the action of the kidneys corrected by use of Dr. Chase's Kidney-Liver Pills, that the pains and aches disappeared. Cure was effected eight years ago, so it can safely be called lasting.

Mr. J. A. Robinson, Sanguedo, Alta, writes:

"I suffered from kidney trouble for years. I also had rheumatism in my back and down one leg, and sometimes I could not walk. The rheumatism would settle in my hip or the calf of my leg and the pain was most unbearable. I tried three different doctors, but it was of no avail. I suffered in this way for about five years. Then Dr. Chase's Kidney-Liver Pills were recommended to me, and before I had used the first box I was completely cured. It is now eight years since I first took them, and I am in the best of health today. I always keep Dr. Chase's Kidney-Liver Pills on hand and take one occasionally." (Mr. D. T. Kuhn, Commissioner of Oaths, says: "Mr. J. A. Robinson, Sanguedo, Alta, is personally known to me, and I have every reason to believe him to be a man of his word under these and all other circumstances.")

Dr. Chase's Kidney-Liver Pills, one pill and take a box. Agents, Ltd., or Edmundson, Bates & Co., Limited, Toronto. Do not be talked into accepting substitutes or imitations, for they only disappoint.

Must Pay Own Way

Soldiers' Dependents Who Left Canada After Signing of Armistice

Return at Own Expense

Ottawa. — Owing to the fact that a number of soldiers' dependents are leaving for England in the expectation of returning with their soldier relatives, the order in council in regard to expenses of repatriation has been amended. It now provides that no expenditure shall be incurred by the government in the repatriation of any soldiers' dependents who left Canada for the United Kingdom, France or Belgium, on or after November 11, 1918.

Those, therefore, who have left Canada for the United Kingdom since the signing of the armistice will have to return at their own expense.

Vote to Keep Rhine Territory

Meetings of Protest in Germany Against "Enslaving Peace"

Paris. — The Prussian national assembly has voted unanimously against the relinquishment by Germany of any of the Rhine territory, especially the Saar basin, according to German dispatches reaching here. The advices also tell of meetings of protest multiplying in all parts of Germany against what is called an "enslaving peace." According to the Zurich correspondent of the journal an ultimatum is being organized by the government through Count von Brockdorff-Rantzau, the foreign secretary.

War Shows Financial Strength of Britain

Paris. — Persistent rumors that all Europe is on the verge of a financial collapse are not justified by the facts, a prominent United States financial expert, who has been engaged for many months in studying the problems facing the peace conference, said in a statement recently.

Conditions were serious, he added, but not panicky, and will doubtless be relieved greatly when peace is signed and the embargo lifted. He predicted that England will be stronger within a year than ever before because of her unusual commercial enterprise and the courage with which she meets her debts by taxation.

Great Britain, with a war debt of \$40,000,000,000, the financier added, is in a situation comparing favorably with her debt and per capita wealth at the conclusion of the Napoleonic wars. The allies owe Great Britain between \$9,000,000,000 and \$10,000,000,000. The financier stated that only about four billions of the twenty billion of dollars invested abroad by England since the war had been disposed of.

Curiosity

Curiosity killed a cat, they say, but curiosity has killed not only a cat but hundreds of people.

There was a pool of methylated spirits leaked from a tank at a railway station in Canada not long ago. Curiosity prompted a man to put a lighted match to it to see if it would burn. It did, and burnt the station as well.

A man found a German mine on the beach in England. Curiosity prompted him to wiggle the mine to see if it would explode. It did, and completely satisfied that man's curiosity.

Teachers' Annual Easter Convention Cancelled

At a recent meeting of the executive of the Alberta Educational Association it was decided to postpone the annual convention until April 1923. The loss of time on account of the influenza epidemic, and the increased railway rates in force, were among the reasons which led to this decision.

Curiosity prompts people to meddle with other people's property, and average whippers take it. Both together, and another cat is killed.

Notice to School Districts Desiring to Hold School Fairs Commencing in Spring 1919

The Department of Agriculture at Edmonton purposes giving assistance in the organization, management and financing of School Fairs through the School of Agriculture at Claresholm. This notice has reference to the territory in Southern Alberta extending from the main line of the C.P.R. south to the boundary.

Briefly, the plan is that a committee of interested citizens shall be organized at the center at which it is proposed to hold a fair, which committee will share with the Department of Agriculture and Education the work and expense of the Fair. A group of from eight to twenty-five schools convenient to the center will be selected. Garden seeds will be distributed through the committee to the pupils of these schools. The pupils will plant the seeds at home, care for the gardens during the summer and in the fall, exhibit samples of the products at a fair. Girls will receive recipes and instructions in connection with the sewing and cooking that they will exhibit at the fair. For further instructions apply immediately to

Sir Thos. White on Need of Foreign Credits

The need of Canada providing large credits to finance her export-trade is being stated by almost every leader in the public life of the country. Speaking on this subject in the house of commons recently Sir Thomas White said:

"It is necessary today and it will be necessary possibly for some time to come for Canada to provide credits to a large extent in connection with the business we shall obtain overseas. In order that our agricultural and manufactured products may be sold, it will be necessary, owing to the conditions of exchange between Canada and the United States, that Canada, like the United States, shall provide credits from which our products shall be purchased."

Every dollar that Canadians put into War Savings stamps increases the funds from which the Dominion government may grant these credits. They cannot be granted unless the money is forthcoming from the people, which means that their savings is the basis on which credits are granted. The purchaser of War Savings Stamps thus helps the country and does himself a good turn.

Detachment of Mounties at Fernie

Fernie, March 24.—Inspector Junket, of the Royal Northwest Mounted Police, in charge of the Blairmore detachment, has been in Fernie for a day or two making arrangements for the housing of that force which is to be stationed in East Kootenay with headquarters at Fernie. There will be a detachment of six men in Inspector, a sergeant, a corporal and three or four constables kept at the headquarters, with detachments of two men each at Corbin, Coal Creek, Gateway and Newgate, thus placing a guard on the international boundary from the Alberta boundary to the crossing of the Kootenay River at Rykert.

It is expected that the mounted force will be established at these places as soon as the development of the force now returning from France are available for home service.

Card of Thanks

W. H. Chappell, senior, and family desire to express their appreciation of the many expressions of sympathy accorded them on the eve of their sorrow, and to thank all who by kind acts and words of comfort helped to lighten their burden of grief.

Tuesday was All Fools' Day, and lots of people around here will have cause to remember it.

"Ikey and Abey"

Did you ever stop to think that there is enough sorrow in this world? I have. But a real gloom chaser is "Ikey and Abey." Mr. Bird Schaffer, who has played Ikey for the past three seasons, is really the best gloom chaser of them all. Mr. Schaffer is also the author of the 1920 edition of "Ikey and Abey," and believe me, he has a side-splitting comedy this season. Mr. Al Boide, who plays Abey, is one of the funniest Jew comedians on the road to-day. He is also a good dancer. It is worth the price of "Scratching the Gravel," a real song and dance. Mr. Don Clinton who plays "Pickles," has a way of his own to make you laugh. Mr. Clinton has been with many of the Chicago and New York musical comedy successes. Mr. George Clark, a handsome juvenile, has a good voice and dresses his part in the latest fashion. Miss Nellie Atanamura, who plays Mrs. Ikey Cohen, is well known throughout Canada. She has a beautiful soprano voice and sings several pretty ballads. She has toured Canada since a child, and you will remember her as a child when she did a very clever act known as "Ted and Nellie McNamara." Miss Anne Engle plays the part of an actress and her personality wins her audience from the start. She sings and dances well. Miss Weagant plays the part of a servant and has a sweet voice. If you want to have a real good laugh and enjoy good singing and dancing, you don't want to miss Ikey and Abey.

Again a graduate of Kennewick College in Seattle adds to his record for turning out students who lead. The Kingston Standard of March 13th had the following to say of Mr. Thos. Appleby, only son of Mr. Thos. Appleby, of Blairmore.

"Dr. Lyon H. Appleby, of Clarendon, Ontario, has won the scholarship in surgery. He is a nephew of the Canadian golf champion, a grand nephew of the late Dr. J. H. Appleby, of Clarendon, Ontario, and a relative of Hon. Justice Craig of Ontario. He was a student of the U. of T. before entering Queen's University. He was overseas with Queen's hospital in Egypt and France for two years, and is now twenty-three years of age. He has had a long record of scholastic success. He won the medical and scholarship in Queen's in his third, fourth and fifth years, and at graduation on January 31st of this year was presented with the medal in medicine and the honor of the medal in surgery. His nearest competitor getting 78 per cent. Just at present Dr. Appleby is house surgeon in the general hospital at Vancouver, B. C., but The Mercury learns that in the autumn he expects to go to England to specialize in surgery."

DIRECTORS' REPORT ON DAVIDSON STRIKE

Directors of the Davidson Gold Mines on their return from the property Monday night spoke with enthusiasm concerning the new ore body opened up last week at the 500-foot level. The find has established the fact that the property is rich in depth. One Director said:

"We found that a cut being driven across the ore body had penetrated 30 feet without having reached the foot wall. It had passed through a vein of uniform values which was impregnated with free gold. The average values over this width of 30 feet will run high as compared with results of the more prominent Porcupine Producers. The vein is estimated to be 40 feet wide, and the assay results were highly satisfactory."

The above statement is sufficient to indicate to the reader the immense possibilities of the Davidson Mine. The big vein is rapidly being developed up, and we think that announcements of first importance will follow from time to time.

National Getting Together

Nature divided the Dominion of Canada into two main parts, the dividing line being that stretch of barren, rocky country north of Lake Superior which separates the fertile farms and thriving cities of the East from the great expanse of prairies in the West. One of the conditions upon which British Columbia agreed to enter confederation was that this

gap between East and West should be bridged by the construction of the C.P.R., and in the half century which has passed it has been the aim of Canadian statesmen, and the national aspiration of the Canadian people, that a strong, united Canadian nation should be built up on this northern half of the continent.

In many ways that aim has been realized. A real Canadian sentiment has been developed; an equally strong attachment to the British crown exists east and west; the development of one section has reacted beneficially upon the other section. There is today a pride in Canada, and a confidence in its future, common to all parts of the Dominion.

Nevertheless it does not require a man of unusual powers of observation, or super-intelligence, to realize that a sharp difference of opinion exists between the East and West on economic grounds, and to some considerable extent in the radicalness of their political views. And it is equally evident that these differences of opinion are becoming more pronounced, and the resulting division between the two sections of the Dominion is widening.

It is not the intention of this article to discuss the causes of this unfortunate difference of opinion, nor the merits of the questions in regard to which East and West hold antagonistic views and exhibit such a lack of sympathy the one with the other. It may, however, be necessary to mention one or two of these issues in order to bring home to our readers the point of this and possibly subsequent articles.

Not a Bit of Waste

Mountain Belches Smoke

London. — Mount Elbrus, in the Caucasus, has been discharging smoke for several days a Russian wireless message from Moscow reports Russian newspapers, as saying. Blocks of ice, which have been above the snow line of the mountain for hundreds of years, it is added, are being carried to the foot of the mountain in torrents. Mount Elbrus is 18,500 feet high and the highest mountain of the Caucasus. It was supposed to have been an extinct volcano.

of which we do not think can be successfully challenged. In subsequent articles, consideration will be devoted, in a strictly impartial and thought-provoking way, to some aspects of this East vs. West Canadian problem, and how to bring about a better national understanding.

British Aid Sympathizers

London.—Winston Spencer Churchill, secretary of state for war, said in the house of commons that the Es- thonians and Lithuanians had promised British protection and recognition and that the Es- thonians had been partly supplied with British arms. There was a considerable German force in that region moving toward Warsaw and possibly Riga. It was increasing German influence, but on the other hand, was saving the district from appalling misery and Bolshevik ravages, and these operations were being performed useful services, were not being discouraged.

Attacked by Asthma.—The first fearful sensation is of suffocation, which hour by hour becomes more desperate and hopeless. But once the relief afforded by Dr. J. D. Kellogg's Asthma Remedy seems nothing less than miraculous. Its help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

Hay Transported Free

Regina, Sask. — The Saskatchewan department of agriculture has issued permits so far for free transportation of 4,100 carloads, or approximately 700,000 tons, of hay from northern points of the province to southern points, and the movement has been active the past few weeks.

British Columbia's Industries

According to the report of the manufacturers' association of British Columbia the productive value of industry for 1918 in the province was approximately \$200,000,000 and employment was given in connection with this industry to 86,000 persons. This included all classes of industry, basic and general, including shipbuilding.

Manitoba Seed in France

Success of Western Canadian Seed Wheat on French Farms

An interesting result of the war has been the introduction of the cultivation of spring wheat from Western Canada in European countries. In France far-reaching results are expected from the introduction of this wheat into that country.

The report of an investigation conducted by M. Martin, director of the agricultural department of Indre-et-Loire, states: In the least successful experiments Manitoba wheat gave 7 to 11.92 cwt. per acre. In other cases the yield varied from 9.54 to 16.72 cwt., the average might without exaggeration be placed at 11.14 per cwt. per acre. These figures are all the more remarkable because the average yield of winter wheat is 3.34 cwt. There is no doubt that 1917 was a very favorable year for wheat-growing in that district; May and June were wet and there was no excessive heat in July. In spite of all disadvantages, M. Martin considers Manitoba wheat excellent for Indre-et-Loire. Thanks to this new variety it will be possible to sow wheat in spring which could not be sown in autumn.

Mild Weather Kills Fish Trade Fort William, Ont. — It is estimated that the wholesale fish dealers at the head of the lakes will lose thousands of dollars in fish business this winter, owing to the mild weather. One fisherman shipped three carloads to Winnipeg last week but they have been refused there on account of soft weather.

Sure! High Heels Cause Corns But Who Cares Now

Because style decrees that women crowd and buckle up their tender toes in high heel footwear they suffer from corns, then they cut and trim at the painful places which merely make the corns grow hard. This suicidal habit may cause lockjaw and women are warned to stop it.

A few drops of a drug called freeze-one applied directly upon a sore corn, root and all, lifts out without pain, and leaves no mark. It is a quarter of an ounce, of freeze-one, which costs very little but is sufficient to remove every hard or soft corn or callus from one's feet.

This drug is an ether compound and acts as a moment and simply shrivels up the corn without inflaming tissue or skin. Clip this out and pin on your wife's dresser.

Equipment for North Country

Edmonton, Alta. — Two carloads of equipment have arrived here from the coast on their way to some point of destination in the north country, where new development enterprises will be set going during the coming season. The shipment includes a large boiler and fittings, a number of boats and a supply of tools and miscellaneous machinery.

An Oil without Alcohol.—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose the famous Dr. Thomas' Eucalypti Oil, and there is no alcohol in it, so that its effects are lasting. Here is no medicinal oil compounded that can equal this oil in its preventive and healing power.

Canadian Indians Confer

Object to Turning Over Lands to Returned Soldiers

Sardis, B. C. — Indians from all over the province held a meeting at Cheamstown, near here, recently, to take action in regard to the proposal being made frequently that certain Indian reserves should be turned over to the returned soldiers. Spoken after, speaker protested against the suggestion that their land should be taken away from them. The land belonged to them, and in the war they were not behindhand in sending their sons to fight for the British flag. If power were given them, they might be willing to sell some of their holdings. They appointed Chief Billy Seepas and George Matheson to go to Ottawa and lay their side of the question before the federal authorities.

Chinese Meetings Forbidden

Lethbridge, Alta. — In connection with the arrest and trial of Chinese conspirators on the Pacific coast, Chief Harty states that shortly after the war broke out the Chinese national league in that city, which numbers about 100 members, was training a squad of about 40 young men in their club rooms. The impression given out by their leaders was that they were preparing to fight for the allies if China declared war on Germany. Later, the chief of police decided that their training was a menace and stopped it, and later still meetings of Chinese in the club rooms were banned.

Memorial at Ypres

Canadian Buildings Will Include Museum and Library London. — An officer of the Canadian headquarters staff, interviewed by a Reuter correspondent, said that the Canadian memorial buildings at Ypres would include a museum of relics connected with the Canadian defence of Ypres, also a library of everything published concerning the battles of the salient. Models of trenches, pictures and official photos and a roster of all the Canadian dead would also be included.

"Such a building would be to Canadians what Shakespeare's house is to visitors to Stratford-on-Avon," the officer said. "When the transfer is effected, we are proposing to convert the ground into a veritable fragment of living Canada amid the ruins by planting maple trees and Canadian shrubs and flowers. 'Canada in Ypres' would, I think, be a good title for what we propose to effect here."

Annual Report Best in History

Sun Life Provides Ample Margin of Safety

Although the past year was a trying one to insurance companies, owing to war losses and the influenza epidemic, the 48th annual report of the Sun Life Assurance Company is the best ever issued. The figures show that the big Montreal corporation maintained its position as the largest of our Canadian life insurance companies, having a gain of nearly \$29,000,000 during the year. The amount of new policies paid for exceeded the \$50,000,000 mark, the exact figures being \$51,591,000.

The total income received during the year was in excess of \$21,651,000, while total assets now amount to \$97,600,000, a gain of nearly seven and a half million dollars. The amount paid to policy holders and their beneficiaries last year reached the large sum of \$9,768,000, but the Sun's huge surplus shows its financial condition is helpful. Another high record was made in regard to income, with \$21,651,000 received, a gain of over \$2,300,000 over the figures for the previous year.

The Sun Life not only did its bit through the protection it afforded, but also used its investment funds to purchase government bonds instead of ordinary securities, thereby assisting materially in the winning of the war.

Altogether the showing made by the Sun Life is a most gratifying one, and policy holders and shareholders have every reason to feel gratified at the records made in 1918. The company is now settled in its new home, whose unequalled facilities enable the officers to do still more effective work.

Recent Losing Secrets of Trade

Paris.—The Germans, who stole so many industrial secrets in Belgium and northern France, are complaining bitterly of the curiosity manifesting by the allies in the manufacturing processes of the German factories in the occupied territory.

The Weltwirtschaftliche Nachrichten says the French have taken documents concerning the manufacture of dyes and that the Americans, in addition to making a careful study of German processes, are trying to hire the best German technicians by offering high salaries.

SPRING WEATHER

HARD ON BABY

The Canadian spring weather—one day mild and bright; the next raw and blustery—is extremely hard on the baby. Conditions are such that the mother cannot take the little one out for the fresh air so much to be desired. He is confined to the house which is often over-heated and badly ventilated. He catches cold, his little stomach and bowels become disordered, and the mother soon has a sick baby to look after. To prevent this an occasional dose of Baby's Own Tablets should be given. They regulate the stomach and bowels, thus preventing or curing colds, simple fever, colic or any other of the many minor ailments of childhood. The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Demand for Farm Labor

Moose Jaw, Sask. — There is heavy demand for farm labor, according to E. Mr. Hagen, of the government employment bureau. City work is very quiet as yet, but there is in the neighborhood of 100 unfilled positions available. Wages are ranging around \$65 per month for the season.

If Thin, Nervous, Run Down, Depressed, This Will Help!

"I'm wear and strain of life has tended in recent years to produce nervous debility in a large percentage of our population. Thousands are affected with a feeling they can't exactly describe. They are always tired and droopy, lack ambition, have poor appetite, look pale and suffer from depressing headaches and insomnia. This condition is full of peril. It is the stepping stone to invalidism, the beginning of a shattered constitution. We advise everyone in this condition to take a good medicine at once and try to get well while yet there is time. Probably no better advice can be given than to use Dr. Hamilton's Pills, which have become famous in restoring the sick to good health. A general tonic for the system at once takes place. The whole body is vitalized by rich and purer blood. The appetite is increased, food is digested and naturally strength rapidly increases. Headaches go because the bowels are regulated and all wastes are carried off. There is no experience about using Dr. Hamilton's Pills; they certainly restore the sick, as a trial will quickly prove. Just as good for the old as the young, suitable to the needs of women and children. This grand family medicine should be in every home."

Spies Drop From Aeroplanes

Men Who Performed Bravest Actions Of War

Before the signs of dawn showed in the sky the old Quirk stood ready on the aerodrome, her tanks full and mechanics waiting to start up the already tested engine. Two figures moved from the dimly lighted mess and approached the aerodrome, one a pilot who had flown many hours over the lines, a man of proved courage and resource, the other a strange figure in the dress of a Belgian peasant.

Turning to the seeming peasant the pilot asked:

"Is there anything else you want to tell me before we start?"

"Nothing."

"And you are quite sure of your route? You would like to have another glance at the map before we move off?"

"No, thanks. I'm quite ready."

They both climbed into the machine.

"—happies wondering what chance was afforded to them by their best officers, fly off at that unearthly hour of the morning carrying a stranger clad in filthy rags as his observer."

Curiosity prompted one of them to ask what time the aeroplane was likely to return, hoping to gain some information in reply, but he was told nothing. There was no knowing when the machine might come back.

"Contact."

A strong swing and the roar of the engine pierced the darkness; a moment later the aerodrome vanished in the darkness, and the yawning mechanics returned to their billets, their curiosity unquenched.

Quarter of an hour later the pilot touched his observer on the shoulder and pointed to the German lines below. The latter smiled grimly and nodded. The machine swept on its passage, high in the darkness of the night, not evoking the challenge of "Archie" and the questioning search lights.

As the first signs of dawn appeared the pilot searched the ground below and carefully compared it with his map. Then he again drew the attention of his passenger, throttled back his engine, and commenced a long glide to earth. He landed safely in an open space in which the trees dimly seen standing here and there in the ghostly greyness, and without a moment's waiting the observer climbed out, shook the pilot by the hand, and vanished in the mist. The pilot at once opened the throttle and sped away home. He had done his business and dropped the spy.

A week later, just as the swirling mist became visible in the dawn of dawn the same aeroplane landed once more in the same field. The pilot glanced anxiously about him, keeping his engine running slowly and quietly the while.

It was not safe to stop the waiting propeller for one instant—the delay of starting up again might mean a fatal mistake. The engine must be started. Any one force fuselage of machine gun bullets might burst around; then the machine would have to rush over the ground and trap into safety.

It would be a sign that plans had miscarried, and the brave man had dropped a week before the engine gave out at a vital moment the pilot and his machine would also be lost.

Minute after minute passed, and still the passenger did not arrive. The pilot began to grow anxious, and looked at his watch. He had landed a few minutes before time, and still had ten minutes to wait before he must give up hope.

A swirl in the mist revealed the gaunt trees, and for a moment the waiting man was startled into gripping the butt of his machine gun. He glanced at his watch again; barely five minutes had passed. He began to think of the man he had carried on the errand, how he had been brought to the aerodrome, like many others, fully realizing the dangers he was about to run, knowing that the slightest mistake would mean death, yet determined to penetrate far behind the German lines and win the information required by the general staff.

The pilot had brought three others on board, and under cover of the night he had waited until the full light of day brought tremendous risks to himself he had been compelled to return alone.

Two minutes were left, and the light grew stronger every second. He held his watch in his hand. He would allow a further minute, until a little incident might delay his passenger, and if no machine awaited his arrival his life would pay forfeit. The time passed. Reluctantly he slipped on his glove, hiding the slowly moving watch, and prepared to move off. Then, as his fingers closed on the throttle, out of the mist came a running figure.

"Quick!" he gasped, clambering into the machine.

The pilot needed no urging and as the bullet continued to fall about the aeroplane he pulled back the control and the machine leapt into the air.

An hour and a half later G.H.Q. was in possession of information which caused the telephone operators to curse the sudden call on the lines, and troops were rushed without warning from one part of the line to another. But the news had arrived in time, and the German attack failed.

The above incident is typical of hundreds which took place along the front in France, in Italy, and indeed, on all fronts, British pilots and still braver men, agents of the British army, flew over the lines and landed in German territory many miles away from the nearest spot.

The "spy"—a term of honor and not of contempt—then left the machine to gain information of the enemy's movements, arranging with the pilot to return and pick him up in some desolate spot at a future date. They alighted without a sound, for, though these agents were frequently British officers chosen for courage, resource and initiative, they of necessity wore a disguise either of an inhabitant of the country or of a German soldier.

Discovery under such conditions meant instant death. Often the mission succeeded, and the agent arrived at the appointed time and found the machine waiting to carry him back to safety. Sometimes the pilot was forced to return without a passenger, and no knowledge came to the rescue of the fate which had overtaken the man he had dropped a few days before.

On one or two occasions the pilot himself has been captured. Their names should be published with the names of the secret agents themselves, the men who have probably performed the bravest actions of the war.

Ukrainian Had Rough Time

Winnipeg, — A Mr. Vozotzy, who declared himself a representative of the Ukrainian-Canadian citizens' league, had a rough time of it in Beaujeu, Man, when he called a meeting of citizens. He declared he was seeking money to send a Canadian Ukrainian delegate to the peace conference. Citizens then took charge of the meeting. He was escorted to the station by a deputation which stopped every fifteen feet to make him kiss the Union Jack and repeat that he was a loyal Canadian. He was put on the Winnipeg train and told not to return.

"What am I to understand by this?" I wrote my husband. I'd stay a week longer if he sent me \$50." "Well?" He sent me \$200."

Airplane patrols to protect Ontario forests may be used in the near future by the provincial government.

A Frightful Death, Suffocated by Asthma

The Dread of Such an Unhappy End Oppresses Every Sufferer

Every sufferer from Asthma knows the terror, the abject fear that overcomes them when struggling for breath. The old-fashioned remedies may relieve, but never cure. Best results come from Catarrhoxone, which cures Asthma and keeps it from coming back.

It is because Catarrhoxone kills the asthma germ that it cures. Choking spells and labored breathing are relieved, suffocating sensations and loss of breath are cured. Every trace of asthma driven from the system, and even old chronic experience immediate relief and lasting cure. Equally good for Bronchitis, throat trouble and Catarrh. The large one dollar outfit includes the inhaler and lasts two months, sold by all dealers or from the Catarrhoxone Co., Kingston, Canada.

Western Roof

Specifications

This is the season of the year when the house owner should think of roof repairs. For the benefit of our readers the following roof specifications are given:

Roof Pitch—Not less than one-fourth pitch.

Rafters—2x4's or 2x6's spaced not over 2 ft. on centres. Size and spacing according to load; braced and nailed solid.

Roof boards—Good grades SIS strips, 1x4 in. or random widths, not over 8 in. wide, nailed solid, using 8d nails, tar paper sheathing.

Shingles—Best grades.

Preparing—Shingles—Shingles should be thoroughly wet before laying if not to be stained.

Staining Shingles—Shingles must be dry before dipping. Dip in stain to at least 8 inches from butt.

Exposure of Shingles—Sixteen inch shingles one-third pitch or more 4 1/2 inches to weather. Less than one-third pitch 4 inches to weather. Eighteen inch shingles one-third pitch or more 5 1/2 inches to weather. Less than one-third pitch 4 1/2 inches to weather.

Shingle Joints—Break joints not less than 1 1/4 inches and see no breaks come directly over each other on any three consecutive courses, covering all nails. Joints to come at 1/2 points of shingle width.

Laying Shingles—Lay first course 2-ply projecting 2 inches over crown mold and 1 in. projection at gables. Throw out defective shingles if any.

Fire Retarding Treatment for Shingles—Shingles must be dry before dipping. Dip in good quality of approved fire retardant paint before laying, and apply brush coat of paint to finished roof.

Nails—3/4 or 4d galvanized cut iron nails.

Heart Palpitated

Could Count Every Beat

When the heart begins to palpitate, it will beat fast for several seconds, then slow, then start to flutter, and feeling of utter depression will come over you, while you are accompanied by weak, fainting and dizzy spells.

When the heart gets into this condition, you become weak, nervous, and miserable, and are unable to attend to either social, business or household duties.

Milburn's Heart and Nerve Pills will give prompt and permanent relief to all sufferers from any heart weakness or nerve derangements.

Mrs. Walter Greaves, Aspley, Ont., writes:—"I had been run down, and doctors told me I was anemic, but did not help me with their medicines. I could not sleep, my heart was palpitated so, and I could count every beat."

I used to have such dizzy spells I would have to go to bed. I was not able to do any work for eight months. A constant pain had taken Milburn's Heart and Nerve Pills and told me what they had done for her. I took eight boxes of them, and now I am able to help every day with the work I am so thankful to tell others what they have done for me, so that they may try this great and wonderful remedy. I hope this may prove good to some one who is suffering the way I did."

Milburn's Heart and Nerve Pills are 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

British Prisoners in Moscow

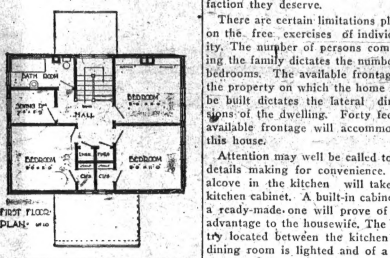

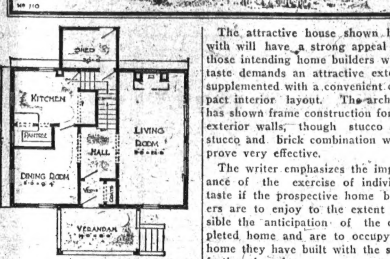

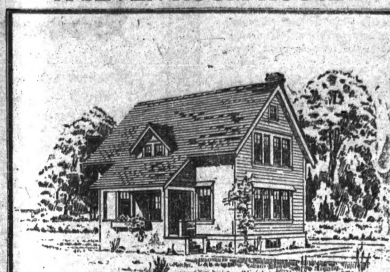

London, — A newly arrived British refugee interviewed by Reuters's agency, mentioned that forty British naval and military prisoners captured on the North Russian front are at present captive in Moscow. The officers are imprisoned in small cells, but the men are allowed to circulate in the town, and even to visit British residents. They are better fed and clothed than the other prisoners. The Bolsheviks evidently are striving to win the men over, but up to now there has been no sign of success.

Good Prices for Wool

Lethbridge, Alta. — Assistant General Manager O'Brien, of the Canadian Co-operative Grain Growers' Association, estimates Western Canada's wool clip for 1919 at 4,500,000 pounds. He believes good prices will prevail, probably around 45 to 50 cents.

A SEVEN ROOM HOUSE

Paint Up! Clean Up!

Editor Architectural Department—The following suggestions would not come unnoticed at this time and if you can spare space on your page it might help.

We are hearing a great deal from day to day with reference to the need for new homes to accommodate the ever increasing number of returning soldiers.

There is, however, an angle to this question that has not received the publicity it deserves, viz: the almost criminal waste of existing property through the lack of the most ordinary every day precautions.

False economy has been preached and practiced during the past few years; homes that would and should have been given the enduring protection of one or more coats of good paint have been neglected and the work of decay and destruction caused by the extremes of our climates, has gone on unchecked.

The cost of painting the average home is more than offset by the increased life and value of well kept property. Most Western towns are made up largely of frame houses and on every hand there is evidence of the need for paint and the painter.

We will shortly be in the throes of our annual clean up campaign.

There are a great many returned soldiers who are painters by trade who are able and eager for work.

World it not be a splendid thing, if property owners helped just at this time by giving employment to painters, by having their premises painted this spring? It would kill two birds with one stone, give needed employment and beautify the property.

Ask for Private Wire

Winnipeg, Man. — For the first time in the history of the grain business in western Canada, application has been made to the board of railway commissioners for the leasing of a private wire from the lake ports on Superior to a Winnipeg grain office.

The applicants are the Saskatchewan and Manitoba Grain Elevator and Co-operative Elevator company, and the object in securing a private leased wire is to get immediate report on the out-turn of the grain cars when they are unloaded and weighed at the lake terminals. The company contends that by using a wire the owners of the cars can be advised to much better and be in a position to sell more quickly.

There are 73 vessels building, built or contracted for in British Columbia. The number of these vessels is 73, and the total of these boats reaches the huge figure of 274,700 tons.

WORKING DRAWINGS AND HOUSE PLANS

Working drawings of the buildings shown on this page every week may be obtained from the Editor at the nominal price of \$5.00 per set. In the case of this design the working drawings may also be obtained through the local lumber dealer if he is a member of the Western Lumbermen's Association.

Important Invention

New Device for Cleaning and Grading Grain

The provincial and Dominion governments working in the interest of the agriculture classes, and fully aware of the facts and the importance of producing grain of the highest possible grade, have been for years unceasing in their efforts to educate the farmer in the proper

methods for the attainment of this object, and the keynote of all their instructions, is now and always has been—"Sow Clean Seed." But since a very large percentage of the grain has become mixed and foul, the problem that farmers are up against, is how to procure this clean seed at a reasonable price.

The miller and large grain dealer, by installation of elaborate and expensive machinery, are able to clean their grain, but this equipment is beyond the means of the average farmer. The farmer, therefore, may hand-pick his grain. But this again is out of the question where hundreds of thousands of bushels are required for seed.

The production of a machine that will separate one particular kind of grain from another and one particular kind of grain from one or more kinds of noxious weeds will make all the separation necessary to absolutely insure clean grain, no matter how dirty, and that will also grade the seed, has been recently invented by Win. M. Ferguson. The machine is now being manufactured in Winnipeg and the industry bids fair to be an important one for Western Canada.

Land Sales May

Winnipeg, Man. — Reports from immigration agents of the Canadian Pacific railway in the United States, declares that a record tide of new settlers from the States will set towards Canada this year, and that it will be made up of a class of well-to-do farmers. Canadian Pacific railway land sales have been exceptionally lively recently, but sales during the coming season are expected to break all records.

IN THE SPRING-TIME

fore his ills become serious. During a hard winter or the following spring one feels rundown, tired out, weak and nervous. Probably you have suffered from cold or influenza which has left you thin, weak and pale. This is the time to put your system in order. It is the time for house-cleaning.

A good, old-fashioned alterative and temperance tonic is one made of wild roots and barks without the use of alcohol, and called Dr. Pierce's Golden Medical Discovery, in tablet or liquid form. This is nature's tonic which restores the tone of the stomach, activity of the liver and steadiness to the nerves, strengthening the whole system. Send Dr. Pierce, Buffalo, N. Y., 10c for trial package Tablets.

Winnipeg, Ont. — Dr. Pierce's Golden Medical Discovery and his Pleasant Pellets are wonderful medicines for house use. I used to suffer with weak lungs, smothering spells and sick-headaches; but now I have taken the above mentioned medicines these conditions have left me.

"Such medicines as Dr. Pierce's are worthy of praise." — Mrs. Ellen Harding 11 Elm Street, West.

The body of Major General Sam Steele, C. B., will be laid to rest in Winnipeg in May with full military honors.

Mr. and Mrs. G. A. LaVoie and son Leonard, left for Dover, New Hampshire, on Wednesday evening of last week.

Capt. W. A. Beebe left last night on a visit to his daughter at Detroit, Mich. He will be away for about two weeks.

The buggy, team and harness donated to the Livingstone Red Cross by Mr. F. W. Godwin, have been raffled for \$232.

FOR SALE—Hatching Eggs from winter laying strain, Pure Bred White Wyandottes. Price \$1.50 setting.—A. J. Smith, Blairmore.

W. Cousins, of Medicine Hat, who is president of the Alberta Motor League, was in attendance at the Good Roads convention yesterday.

James Bennett, of Cowley, was in town on Wednesday representing the rural municipality of Livingstone at the Good Roads Convention.

Mayor Hardie, A. G. Baalim, of the Rotary Club, and D. E. Harrie, of the Board of Trade, represented Lethbridge at the Good Roads convention on Wednesday. They were accompanied by H. W. Crawford and A. Parks.

Jack MacDonald has moved down from commercial centre to the "Lower Five" part of the city, next door to The Enterprise. He says he can peddle anything from a first-class aeroplane to a second-hand marriage certificate.

Tom Stevenson, a Lethbridge boy of fourteen years, was killed almost instantly on Sunday last by a bullet from a .22 rifle purchased by him the day before. He was out shooting gophers and was evidently in the act of looking down the barrel when the gun went off, the bullet entering his forehead just above the left eye.

Rod and Gun for March contains stories by H. C. Haddon; Edward P. Martin, Aubrey Fullerton, H. Mortimer Batton and other well known outdoor subjects. "The How of Casting" is explained by Robert Page Lincoln. And Aviator Canadian writes from experience of "Fighting in the Air." Rod and Gun is published at Woodstock, Ont., by W. J. Taylor, Limited.

The Anniversary service of the Institutional Church at Coleman will be held on Sunday, April 13th. The Rev. (Capt.) Denoon, of Knox Church, Lethbridge, will conduct the service. Mr. Denoon is an able and forceful speaker and large audiences are expected to hear him. On the Monday eve, Capt. Denoon is to deliver a lecture on his two years at the front. Wherever Mr. Denoon has delivered this lecture new impressions of the war and deeper gratitude to the boys who fought in it have been the result. The Ladies Auxiliary are having the usual supper. Don't miss any of these treats.

Mr. and Mrs. Raul Green, have moved into their commodious and beautiful bungalow at the corner of First Avenue and Victoria Street.

Former Blairmore Boy Has Good Record

Lethbridge can boast of being the birthplace of a young man, who won more than usual distinction in the war. His name is J. W. Boyd, and he is a sergeant major with the 60th Alberta, although now a resident of Cumberland, B. C. "Over There" he won the Military Medal with bar and also the Distinguished Conduct Medal, and had altogether a wonderful record.

Sergeant Major Boyd was born and raised in Lethbridge and is a brother of Mrs. R. J. Campbell, 210 7th ave., E., and a brother of Joseph Boyd, who enlisted with the overseas Mounted Police contingent.

A Vancouver exchange gives the following account of Sergeant Major Boyd's exploits:

"He is an N.C.O. of extraordinary character and his fearlessness is an estimable inspiration to all ranks of the battalion," says the official report. He is only 25 years of age and went overseas with the 60th battalion from Alberta, but Cumberland is his home and upon discharge he will join his parents at the island city. In the two months of August and September he won the Military Medal, the bar to the Military Medal and the Distinguished Conduct Medal and was promoted from corporal to sergeant major.

In front of Hells, on August 10 and 11, he won the Military Medal for conspicuous gallantry and leadership. During the attack his company was held up by heavy machine gun fire. With absolute disregard for his personal safety and having in view only the success of the operation, he crawled forward and bombed one enemy machine gun crew from the flank. After silencing the gun he rushed the position, bayonetting the three remaining members of the crew. This enabled his men to come forward and also set an example that made it possible for his company to reach and consolidate the final objective. Throughout the operations his efforts were heroic.

He was immediately largely assisted in making the operation a complete success. After this exploit he was promoted to sergeant and continued to win glory. In front of Dury during the operations from September 2 to 4, he commanded his platoon with conspicuous gallantry and utter disregard for his personal safety, setting a fine example to his men.

On the morning of September 2 when the left flank of his command was held up by an enemy machine gun post, he, at the head of the men, rushed the position and captured it, killing three of the crew and capturing twelve of the enemy who were in the trench.

For this he was awarded a bar to his Military Medal.

Sergeant Boyd kept up his splendid work and was again mentioned in dispatches for his services, before Bourlon and Cambrai, September 27 to 29. The official citation reads:

"For conspicuous gallantry, leadership and devotion to duty. When his platoon officer was wounded on September 27, he took command, fearlessly led his platoon and by sheer personal bravery and inspiring example did dutifully execution to the enemy. He was always where he was most effective and repeatedly rushed enemy posts, killing freely and capturing many of the enemy."

On September 29 when attacking the Marston line he again fought in the same trenches, gallant, unswerving and in spite of stubborn resistance, his platoon never faltered but accomplished a great success largely owing to his gallant leadership and disregard of danger.

On the night of September 29-30 the situation was not clear. For a time, and owing to much wire and difficult ground, companies and units were not in touch with each other. Sergeant Boyd undertook to find out the situation, which he succeeded in doing. In crossing a gap from one company to another he ran into and was fired upon by a Boche patrol. He fought and dispersed them, reported back to his company then went back to battalion report center, got in touch with battalion headquarters and gave the situation forward. Afterwards he carried out continuous patrols until morning.

He is an N.C.O. of extraordinary character and his fearlessness is an inspiring inspiration to all ranks in the battalion.

The Distinguished Conduct Medal and promotion to rank of sergeant-major was the result of this display of bravery."—Lethbridge Herald.

Sergeant Major Boyd was a resident of Blairmore at the time of his enlistment, being the eldest son of Mr. and Mrs. James Boyd, who at that time lived on Ninth Avenue south.

W. R. Welsh and James Cardie are down from Calgary this week and looking well.

Private Wilfrid Goddard returned from overseas this morning looking well.

A grand dance will be given by the G. W. V. A. at Hillcrest on Monday night next.

F. C. Shaw is this week moving from Eleventh Avenue to the West Canadian town-site, occupying the house just vacated by Mr. Raul Green.

"Ike and Abe" will be the attraction at the opera house on Tuesday night next. This company comprises about twenty-five people.

A man named J. R. Stevens was found in his room in Macleod in a partly decomposed condition, having died about four days before the gruesome discovery was made.

Lethbridge schools have been allowed to reopen, the flu epidemic having abated—but the ban is still in effect as regards children under 16 attending theatre and stores.

The Blairmore Trading Co. are this week conducting a big stock-reducing sale, commencing Saturday. See their bills and pay the store a visit.

L. H. Putnam, secretary of the local G. W. V. A., went to Macleod on Tuesday night to attend the funeral of a deceased comrade, as representative from the Crows' Nest Pass. From Macleod he proceeded to Calgary and will return to Blairmore this week end.

A public meeting will be held in the opera house on Sunday afternoon at 2 o'clock by Blairmore local of the G. W. V. A., which will be addressed by Mr. A. E. Hume.

Field secretary, Mr. Mitchell, of Calgary, labor secretary, and Mr. T. Longworth, of Lethbridge, president of the Alberta G. W. V. A. Everybody is invited to attend.

When David W. Griffith was directing scenes just back of the trenches in France, shells fell and exploded within a hundred feet of him three different times, and at each explosion Lillian and Dorothy Gish promptly fainted. The bursting shells are shown in Mr. Griffith's stupendous love drama, "Hearts of the World," playing at the opera house on April 15 and 16.

In all 120,000 feet of film was exposed in making D. W. Griffith's supreme triumph, "Hearts of the World," playing at the opera house April 15 and 16, but only 12,000 feet are shown on the screen. As Mr. Griffith and his camera men spent days and days cutting this precious film—every inch of which was a drop of blood cut out of his heart—the great producer had the saddest period of his life. Every turn of the crank represented the realization of his desire, the greatest picture ever made, and to have it cut down to an evening's entertainment—was like cutting off the ears of his favorite child.

Remember the Anniversary services to be held at Central Union church on Sunday next. A grand Sunday School rally will take place in the afternoon, to which parents and children and all interested in the good work of the Sunday school are invited. Rev. Mr. Powell, of Calgary, will be present and address the children. At 7:30 the Anniversary Service proper will be held. Rev. Thomas Powell will be the speaker. Mr. Powell is an able, interesting and pleasing speaker, and has become very popular as a pulpit orator. A large audience will greet him on Sunday evening. The Union orchestra will attend. At 8 o'clock on each evening of next week Mr. Powell will conduct special meetings.

Miss Helen Gavelin was up from Gratum to spend last week end with her mother and brother here.

Among the veterans to return to Canada this week on the Empress

the Pass this week end are the following: D. W. Parrish, J. A. McAllister, Coleman, W. Ironmonger, Hillcrest; O. Musfeldt, Lundbreck. Arrivals on the Regina include T. Derbyshire, A. Paquin, and W. J. Roche, Coleman.

The social evening held in the Oddfellows hall last night by the members of the I. O. O. F. was a real success. After a whist dinner, the program was rendered, the principal items of interest being Trono's orchestra, Mrs. McAllister's cake and Mr. Andrew's definition of a Beechman's pill. It is the intention of the social committee to continue the social program through the early part of the summer.

The case against Emperor Pick came up for hearing in the local police court on Monday last, F. M. Pinkney, J. P., presiding. A considerable amount of "substance" evidence was produced and the atmosphere created was such as to put to sleep three dry spectators occupying a bench near the witness stand. Six bottles of beer that had been sent to Edmonton were analyzed by the provincial analyst and were found to contain proof spirits of nearly 7 per cent. Most of the other stuff, including gin, Jamaica rum, etc., could be sworn to by anyone who had any knowledge of the pleasing taste and small effect of that stuff. Mr. Gillis appeared for the accused, and Mr. Campbell, crown prosecutor, for the Crown. Mr. Gillis asked for an acquittal on the grounds that the evidence submitted could have been used in connection with the case heard against Pick on the 4th February, when Pick was fined \$100 and costs for selling a stool pigeon a stomach adjuster over the bar of his refreshment parlor. Mr. Campbell asked for conviction and a conviction was registered without a fine, but an order for the cancellation of the goods seized on February the 14th.
